LIST OF JOURNALS REGULARLY SEARCHED

So that users of PSYCHOLOGICAL ABSTRACTS may know the extent of our coverage, we publish below the eighth annual list of journals which are regularly searched. This list, revised by the deletion of journals which it is no longer possible to cover regularly and by the addition of other journals, totals 505. Journals received by the editorial office are marked with an asterisk; other journals are searched by the abstractor. The list is correct as of 1 October 1954. In those cases where no abstractor is indicated, the journal is temporarily unassigned.
